

Video series control report

Driving Theory Test Practice | England | 26 October 2026

Delivery status: 20 complete chapter videos for final editorial and independent professional review. Publication is not approved.

ID	Chapter / companion lesson	Book page	Time
V01	Start Here	5	3:14
V02	Alertness	7	3:39
V03	Attitude	14	3:29
V04	Safety and Your Vehicle	21	3:49
V05	Safety Margins	29	3:37
V06	Hazard Awareness	36	3:23
V07	Vulnerable Road Users	44	3:35
V08	Other Types of Vehicle	52	3:20
V09	Vehicle Handling	58	3:43
V10	Motorway Rules	66	3:42
V11	Rules of the Road	74	3:51
V12	Road and Traffic Signs	92	3:46
V13	Documents	106	3:47
V14	Incidents, Accidents and Emergencies	112	3:57
V15	Vehicle Loading	121	3:44
V16	Understand the Question	127	3:36
V17	Hazard Perception	132	3:09
V18	Four Practice Tests	140	3:12
V19	Your Final Readiness Check	185	3:54
V20	Answers and Targeted Review	191	3:13

Total chapter running time: 71:39. Each lesson has eight scenes and one original three-option quick check with an explanation. The 3:15 roundabout pilot is a separate additional lesson.

What was checked

Content and teaching

The 20 lessons follow the chapter order of the revised 272-page manuscript. Teaching paragraphs are adapted from that manuscript; companion cases and quick checks are original. Each question was checked against its stated answer and explanation. Both the selected response and the rejected alternatives are discussed. These are not official DVSA examination items.

The test format, pass marks, key numerical rules, motorway decisions, child restraints, towing, identification requirements and adult first-aid awareness were checked against the primary sources listed on the following page. MUST/MUST NOT and advisory behaviour are distinguished in the explanations; local instructions and stated exceptions remain relevant.

Production and technical verification

All 20 MP4s were checked with ffprobe and fully decoded with ffmpeg without reported decoding errors. Verified format: H.264 video, AAC audio, 1280 x 720, 24 frames per second. Media durations and audio/video stream lengths agree within 0.15 seconds. The caption set contains 970 ordered, non-overlapping caption intervals; captions are burned in and supplied as editable SRT files.

All 160 scene layouts were inspected through rendered review sheets, with additional changing-state samples for selected hazard and road diagrams. Checks covered readable text, the question-to-answer transition, left-hand traffic, clockwise roundabout circulation and separation of teaching overlays from real road markings. The quiz includes 2.5 seconds of thinking time before the answer scene. Graphics are schematic and not to scale.

The new chapter narration was generated locally using Piper and the British English Alba model; manuscript text was not submitted to a remote speech service for these completed narrations. Loudness processing targets -16 LUFS with a -1.5 dB true-peak limit. This is a processing target, not a claim of a complete perceptual audio audit.

Open publication gates

Required: independent review of all lessons by a qualified professional in UK driving education; qualified first-aid review of V14; a complete human listening and pronunciation pass; and final distribution/credit review. None of those independent sign-offs has been performed. No live player installation, hosting, QR integration or public publication has been carried out.

Primary sources and review date

The following primary references were consulted on 26 October 2026. Links identify the actual pages used. The editable package also retains the manuscript source register, whose entries should not be mistaken for a separate new audit of every linked page.

01. [Car theory test: multiple-choice format](#)
02. [Car theory test: hazard perception](#)
03. [Pass marks and result validity](#)
04. [Required test identification](#)
05. [The Highway Code: introduction and hierarchy](#)
06. [Driver fitness and restraints: rules 89-102](#)
07. [Signals, gaps, speed and road lines: rules 103-158](#)
08. [Junctions, overtaking and roundabouts: rules 159-203](#)
09. [Vulnerable users and other vehicles: rules 204-225](#)
10. [Adverse weather: rules 226-237](#)
11. [Motorway rules 253-274](#)
12. [Breakdowns and incidents: rules 275-287](#)
13. [Vehicle maintenance and tyre requirements](#)
14. [Road first aid: Highway Code Annex 7](#)
15. [Traffic signs and signal meanings](#)
16. [Light signals controlling traffic](#)
17. [Speed limits by road and vehicle](#)
18. [Towing entitlement and maximum authorised mass](#)
19. [Child seat requirements](#)
20. [Private learner supervision](#)
21. [Resuscitation Council UK: 2025 adult basic life support](#)

Hazard examples teach observation and development. They do not reproduce DVSA camera views, scoring windows, licensed clips or a measured equivalent examination score. The first-aid lesson is adult awareness and cannot certify practical competence.

Rights, voice and editable files

Voice attribution

V01-V20 use locally synthesised speech from Piper 1.8.0 and en_GB-alba-medium. Alba is a female British English voice with a Scottish accent. This differs from the earlier pilot voice. The model card identifies the Alba speech corpus as its dataset and links to CC BY 4.0. The repository advertises MIT at repository level; the specific model card and dataset terms are retained together. No endorsement is implied.

Dataset: Valentini-Botinhao, Cassia; Yamagishi, Junichi (2019), Alba speech corpus, University of Edinburgh. [doi:10.7488/ds/2506](https://doi.org/10.7488/ds/2506). CC BY 4.0. Use here: new synthetic narration with timing, pauses and loudness processing. Dataset terms preserve moral and personality rights. Retain ATTRIBUTIONS.txt with any distributed collection.

Graphics, text and software

Road, sign and vehicle diagrams are original geometric teaching constructions. No official DVSA footage, question bank or official illustration is reproduced. Public-sector information is acknowledged under the Open Government Licence where applicable. DejaVu font files and their licence are included. Piper software is GPL-3.0 and is not redistributed in the editable ZIP; the model is also not bundled. These notes document provenance rather than offering a legal clearance opinion.

Portable editing baseline

The editable source is Python/Pillow 2D animation, not a Blender timeline. Per-lesson JSON contains the eight scenes, text, timings and key points. SRT/JSON captions and the compressed narration are supplied. Visuals can be rebuilt using the provided audio without a voice service or a model download. The README explains how to regenerate changed narration locally if required.

The roundabout pilot is retained as a separate extra, with its prior source package and review notes. Its earlier provisional narration and final voice/right review remain separate from the locally narrated 20-lesson series.

Quality Gate: production deliverables complete for review; independent technical, first-aid and full human audio review still open. Do not describe this collection as approved or ready for publication.
